

Mid-Point Peer Review Institutional Comment

Cazenovia College

MSCHE Research Unit

Fall, 2019

Introduction

This is a report on the general health and status of an institution following their Annual Institutional Update. The report examines three key metrics that assess aspects of the institution's health (Student Achievement, Viability and Capacity, and Financial Health). There may be a prompt to respond to concerns raised by the Commission. If so, a text box will be provided, as well as brief explanation as to why the metric is concerning. Responses must be kept to no more than 2,000 characters (including punctuation and spaces). **If no text box appears, no response is required.**

Student Achievement

The institution's student achievement performance is **minimally/not concerning**. This is because the graduation rate has consistently been above 25% for the last four years. Additionally, the graduation rate has remained relatively level during this time.

Viability and Capacity

The institution's Viability/Capacity performance is **minimally/not concerning** because the FTE has remained relatively level during the last four years.

Financial Health

The institution's Financial Health performance is **minimally/not concerning**. This is because CFI score has remained above 1 for the last 4 years, and the Net Assets has been positive for three of the last four years.
